'07 Outlook Forecasts Modest Producer Gains

As the final quarter of 2006 arrives, forecasts about 2007 become more abundant and, hopefully, more accurate. The latest estimates from the World Agricultural Outlook Board, the USDA's main economic forecasting unit, project average annual producer milk prices in 2007 between \$13.00 and \$13.90 per hundredweight, approximately \$0.70 higher than 2006. The producer price improvements should range from \$0.25 to \$1.15 higher. The 2007 Class III price should range between \$12.10 and \$13.00 per hundredweight while the Class IV price is projected to range from \$10.45 to \$11.45 per hundredweight.

Milk Promotion Programs Announcements

The USDA has made recent announcements regarding both the producer and processor milk promotion programs. The National Dairy Promotion and Research Board, composed of 36 dairy farmers representing 13 regions of the country, administers a coordinated program of promotion, research and nutrition education. Seven new members and five incumbent members were reappointed to serve three-year terms through 2009. Region 8 (the states of FL, GA, NC, SC and VA) remain represented by John M. Larson of Okeechobee, FL.

The USDA is asking fluid milk processors and other interested parties to nominate candidates for the National Fluid Milk Processor Promotion Board, the program of advertising and education designed to promote fluid milk products. Five of the positions on the Board represent geographic regions, and two are at-large processor positions. All nominees must be active owners or employees of a fluid milk processor for all regional positions and both at-large positions. Visit www.ams.usda.gov/dairy/dairyprp.htm for more details on the nomination process.

Blend Price Rises

The uniform blend price in Hillsborough County, FL, was \$14.70 per hundredweight for milk at 3.5 percent butterfat for the month of September. This represents a \$0.05 increase compared with the previous month but is \$2.77 per hundredweight lower when compared with September of last year.

Class I utilization was 88.52 percent in September, a 0.20 percent increase compared with the previous month and a 0.15 percent decrease versus September of last year.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in August was 15.13 billion pounds, an increase of 1.5 percent from August 2005 and a decrease of 0.52 percent when compared with July 2006. Estimated total cheese output (excluding cottage cheese) in August was 787 million pounds, 3.9 percent above August 2005 and 2.5 percent above July 2006. Butter production was 89.2 million pounds, 4.3 percent below August 2005 and 5.7 percent below July 2006. Nonfat dry milk production was estimated at 74.4 million pounds in August, 14.2 percent lower than August 2005 and a decrease of 18.6 percent compared with the previous month.

The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 2.57 in September, a decline of 0.70 from September 2005 but an increase of 0.10 compared to a revised August 2006 feed price ratio of 2.47.

Through August, cumulative sales of packaged fluid milk products into Florida were 1.950 billion pounds. Compared with last year (1.988 billion pounds), total packaged sales were lower by 1.9 percent. Pool plant sales have actually increased by 0.9 percent, but, in the aggregate, were offset by nonpool plant sales that were down 19.0 percent.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in September 2006 is \$14.70 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$10.28 per hundredweight plus 3.5 times the uniform butterfat price of \$1.3670 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In September, Class I use accounted for 89.99% of all producer skim milk (priced to handlers at \$6.64 per hundredweight, plus the Class I differential and 50.56% of producer butterfat (priced to handlers at \$1.2703 per pound plus Class I differential). Class II use accounted for 6.67% of all producer skim milk (\$6.99 per hundredweight) and 36.02% of producer butterfat (\$1.4261 per pound). Class III use accounted for 0.23% of all producer skim milk (\$7.59 per hundredweight) and 6.17% of producer butterfat (\$1.4191 per pound). Class IV use accounted for 3.11% of all producer skim milk (\$6.36 per hundredweight) and 7.25% of producer butterfat (\$1.4191 per pound).

Receipts of producer milk during September 2006 totaled 231.8 million pounds, 4.6 million pounds more than was pooled in September of last year. Florida producers supplied 151.6 million pounds of milk in August 2006 to pool plants or 62.27% of the total producer milk pooled in Florida. In August 2005 Florida producers supplied 66.33% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for September 2006. In-area Class I route disposition totaled 251.1 million pounds in August 2006, 5.4 million pounds less than August 2005. This is a decrease of 1.4 percent after making adjustments for calendar composition.
