## Class III and Class IV Product Price Formulas Tentative Final Decision Issued

The U.S. Department of Agriculture (USDA) has announced a tentative final decision to amend the manufacturing (make) allowances contained in the Class III and Class IV product price formulas in all Federal milk marketing orders. The decision was based on the record of the first session of an emergency public hearing held in Alexandria, VA, on January 24-27, 2006, and a second session held in Strongsville, OH, on September 14-15, 2006.

The decision amends the manufacturing (make) allowances for cheese, butter, nonfat dry milk (NFD) and dry whey. Specifically, this decision adopts the following increased manufacturing allowances: cheese -- \$0.1682 per pound; butter -- \$0.1202 per pound; NFD -- \$.1570 per pound; and dry whey -- \$0.1956 per pound. These amendments are subject to producer approval before they can be implemented. A vote is currently underway to determine if producers approve of the decision.

The tentative final decision was published in the November 22 Federal Register. A link to the decision text at the AMS Dairy Programs website has been provided under "What's New" at [www.fmmatlanta.com](http://www.fmmatlanta.com). Public comments are due 60 days after publication in the Federal Register, on January 22, 2007.

## Hearing Held On Class I and II Price Formulas

The USDA recently held a hearing on proposed amendments to the Class I and Class II milk price formulas applicable to all Federal milk marketing orders. The hearing, held on December 11 in Pittsburgh, Pennsylvania, was requested by the National Milk Producers Federation (NMPF). The proposed changes would effectively increase the Class I and Class II price movers to account for increases in marketing costs associated with serving these markets, according to the NMPF. A link to more information on the hearing is available at [www.fmmatlanta.com](http://www.fmmatlanta.com) under "What's New".

## Blend Price Increases

The uniform blend price in Hillsborough County, FL, was \$15.88 per hundredweight for milk at 3.5 percent butterfat for the month of November. This represents a \$0.15 increase compared with the previous month but is \$1.83 per hundredweight lower compared with November of last year. The blend price has risen a total of \$1.74 since June, when it had reach a low of \$14.14 per hundredweight.

Class I utilization was 87.86 percent in November, a 3.26 percent increase compared with the previous month and a 0.37 percent decrease compared to November of last year.

## National Dairy Situation

The USDA estimates that the total U.S. production of milk in October was 14.86 billion pounds, an increase of 1.7 percent from October 2005 and a decrease of 0.76 percent when compared with September 2006 on a daily average basis. Total cheese output (excluding cottage cheese) was 800 million pounds, 5.2 percent above October 2005 and 2.0 percent above September 2006. Butter production in October was 118 million pounds, 8.5 percent above October 2005 and 13.9 percent above September 2006. Nonfat dry milk production was estimated at 72.7 million pounds in October, 1.2 percent lower than October 2005 and a decrease of 8.4 percent compared with the previous month on a daily average basis.

The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 2.34 in November, a decline of 0.19 from the revised October milk-feed ratio of 2.53.

Total U.S. sales of fluid milk products were estimated at 4.8 billion pounds in October, up 0.1 percent from the previous month after adjusting for calendar composition.

**F.O. 6 - FLORIDA: CALCULATION OF UNIFORM PRICES - NOVEMBER 2006**

## Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in November 2006 is \$15.88 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$11.32 per hundredweight plus 3.5 times the uniform butterfat price of \$1.4162 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In November, Class I use accounted for 89.28% of all producer skim milk (priced to handlers at \$7.77 per hundredweight, plus the Class I differential and 51.01% of producer butterfat (priced to handlers at \$1.4004 per pound plus Class I differential). Class II use accounted for 8.12% of all producer skim milk (\$7.37 per hundredweight) and 35.59% of producer butterfat (\$1.3922 per pound). Class III use accounted for 0.09% of all producer skim milk (\$8.28 per hundredweight) and 3.01% of producer butterfat (\$1.3852 per pound). Class IV use accounted for 2.51% of all producer skim milk (\$7.52 per hundredweight) and 10.39% of producer butterfat (\$1.3852 per pound).

Receipts of producer milk during November 2006 totaled 251.2 million pounds, 3.9 million pounds more than was pooled in November of last year. Florida producers supplied 151.9 million pounds of milk in October 2006 to pool plants or 60.78% of the total producer milk pooled in Florida. In October 2005 Florida producers supplied 66.18% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for November 2006. In-area Class I route disposition totaled 244.9 million pounds in October 2006, 2.2 million pounds more than October 2005. This is a increase of 0.78 percent after making adjustments for calendar composition.

<b>Total Disposition in Marketing Area</b>	<b>244,948,613</b>	<b>100.0%</b>

## New Market Information Available

Recently, the U. S. Department of Agriculture made available two new sources of market information. The first of these is an updated survey of milk handlers in Federal milk marketing orders who package Class I products. Handlers were asked to submit information on the containers in which fluid milk products are sold, and the methods of distribution used to market such products. "*Packaged Fluid Milk Sales in Federal Milk Order Markets: By Size and Type of Container and Distribution Method during November 2005*" is available at the AMS Dairy Programs website ([www.ams.usda.gov/dairy](http://www.ams.usda.gov/dairy)) under 'Milk Marketing Order Statistics' and the 'Special Reports' link.

The second new source of dairy market information is the Over-Order Price Report. Federal milk marketing orders set minimum prices for regulated handlers that purchase milk. These prices are not necessarily what sellers of milk receive, as cooperatives and independent dairy producers can negotiate prices higher than Federal order minimums. Any higher than minimum price is known as an over-order price, which is the effective price processors pay for milk. This information, collected in the Over-Order Price Report, is obtained from the price lists issued by cooperatives or pricing agencies (including all the credits that milk processors can earn), billing statements of the cooperatives or pricing agencies, and producer payrolls for cooperatives and independent producers alike. All milk pooled and priced by an order is included in the report.

The Over-Order Price Report contains information for all Federal milk marketing orders, except for the Northeast Order. The reports list over-order charges for each class of milk and for all classes combined by Federal milk order marketing area on a monthly basis. For example, the report shows that in July the over-order charge in the Florida Order for Class I milk was \$3.32, Class II was \$1.19, Class III was \$0.62 and Class IV was \$0.02 for an average on all classes of \$2.93 per hundredweight.

This report is available at the AMS Dairy Programs website ([www.ams.usda.gov/dairy](http://www.ams.usda.gov/dairy)) under 'Milk Marketing Order Statistics' and the 'Class and Producer Prices and Component Prices' link.
