ISSUED FOR THE INFORMATION OF PRODUCERS WHO ARE NOT MEMBERS OF COOPERATIVE ASSOCIATIONS

## '07 Outlook Forecasts Modest Producer Gains

As the final quarter of 2006 arrives, forecasts about 2007 become more abundant and, hopefully, more accurate. The latest estimates from the World Agricultural Outlook Board, the USDA's main economic forecasting unit, project average annual producer milk prices in 2007 between \$13.00 and \$13.90 per hundredweight, about \$0.70 higher than 2006. These producer price improvements should range from \$0.25 to \$1.15 higher. The 2007 Class III price should range between \$12.10 and \$13.00 per hundredweight while the Class IV price is projected to range from \$10.45 to \$11.45 per hundredweight.

## Milk Promotion Programs Announcements

The USDA has made recent announcements regarding both the producer and processor milk promotion programs. The National Dairy Promotion and Research Board, composed of 36 dairy farmers representing 13 regions of the country, administers a coordinated program of promotion, research and nutrition education. Seven new members and five incumbent members were re-appointed to serve three-year terms through 2009. Region 8 (the states of FL, GA, NC, SC and VA) remain represented by John M. Larson of Okeechobee, FL.

The USDA is asking fluid milk processors and other interested parties to nominate candidates for the National Fluid Milk Processor Promotion Board, the program of advertising and education designed to promote fluid milk products. Five of the positions on the Board represent geographic regions, and two are at-large processor positions. All nominees must be active owners or employees of a fluid milk processor for all regional positions and both at-large positions. For more details on the program, including forms required for nominating candidates, visit [www.ams.usda.gov/dairy/dairyprp.htm](http://www.ams.usda.gov/dairy/dairyprp.htm).

## Blend Price Continues to Climb

The uniform blend price in Fulton County, GA, was \$13.68 per hundredweight of milk at 3.5 percent butterfat for the month of September. The blend price is \$0.29 higher than the previous month but is \$2.64 lower than September 2005. September is the third consecutive month the uniform blend price has risen.

Class I utilization was 66.34 percent in September, a slight decrease of 0.28 percent compared with the previous month and 3.53 percent lower than September of last year.

## National Dairy Situation

The USDA estimates that the total U.S. production of milk in August was 15.13 billion pounds, an increase of 1.5 percent from August 2005 and a decrease of 0.52 percent when compared with July 2006. Estimated total cheese output (excluding cottage cheese) in August was 787 million pounds, 3.9 percent above August 2005 and 2.5 percent above July 2006. Butter production was 89.2 million pounds, 4.3 percent below August 2005 and 5.7 percent below July 2006. Nonfat dry milk production was estimated at 74.4 million pounds in August, 14.2 percent lower than August 2005 and a decrease of 18.6 percent compared with the previous month.

The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 2.57 in September. This is a decline of 0.70 from September 2005 but an increase of 0.10 compared to a revised August 2006 feed price ratio of 2.47.

## Transportation Credit Update

Claims on the Federal Order 7 transportation credit balancing fund for September 2006 were made for \$1,198,791.23. Since the available balance was \$968,612.86, eligible claims were paid at the rate of approximately \$0.81 on the dollar.

## F.O. 7 - SOUTHEAST: CALCULATION OF UNIFORM PRICES - SEPTEMBER 2006

### Calculation of Uniform Butterfat Price:

## Southeast Market Summary

The minimum order uniform price for payment to producers supplying the Southeast Order marketing area during September 2006 is \$13.68 per hundredweight for milk with a 3.5% butterfat test in Fulton County, Georgia. This is .965 times the uniform skim milk price of \$9.19 per hundredweight plus 3.5 times the uniform butterfat price of \$1.3758 per pound. Payment to producers may be reduced by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In September, Class I use, which is primarily bottled or packaged fluid milk, accounted for 67.43% of all producer skim milk (priced to handlers at \$6.64 per hundredweight, plus the Class I differential, see page 2) and 38.01% of producer butterfat (priced to handlers at \$1.2703 per pound plus Class I differential). Class II use, which is milk used in fluid cream products and miscellaneous manufacturing, accounted for 12.51% of all producer skim milk (\$6.99 per hundredweight) and 25.93% of producer butterfat (\$1.4261 per pound). Class III use, mostly milk used to produce cheese, accounted for 17.77% of all producer skim milk (\$7.59 per hundredweight) and 21.72% of producer butterfat (\$1.4191 per pound). Class IV use, generally milk processed into butter and powder, accounted for 2.29% of all producer skim milk (\$6.36 per hundredweight) and 14.34% of producer butterfat (\$1.4191 per pound).

Receipts of producer milk during September 2006 totaled 607.3 million pounds. There were 28 regulated pool distributing plants, 3 pool supply plants and 11 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for September 2006. Class I route disposition in the area totaled 436.5 million pounds in August 2006.
